**Total Tests– Eaton County**

# Tests	% Pos.	% Neg.
43173	2.28%	97.72%

\*Provided by the State of Michigan

The age distribution chart to the left shows the changing demographics that are testing positive each month. In March, when testing was limited, older populations tested positive more frequently than younger populations. Over time that has shifted, and younger school and working age populations have begun to test positive more as testing has expanded for those who have mild or no symptoms.

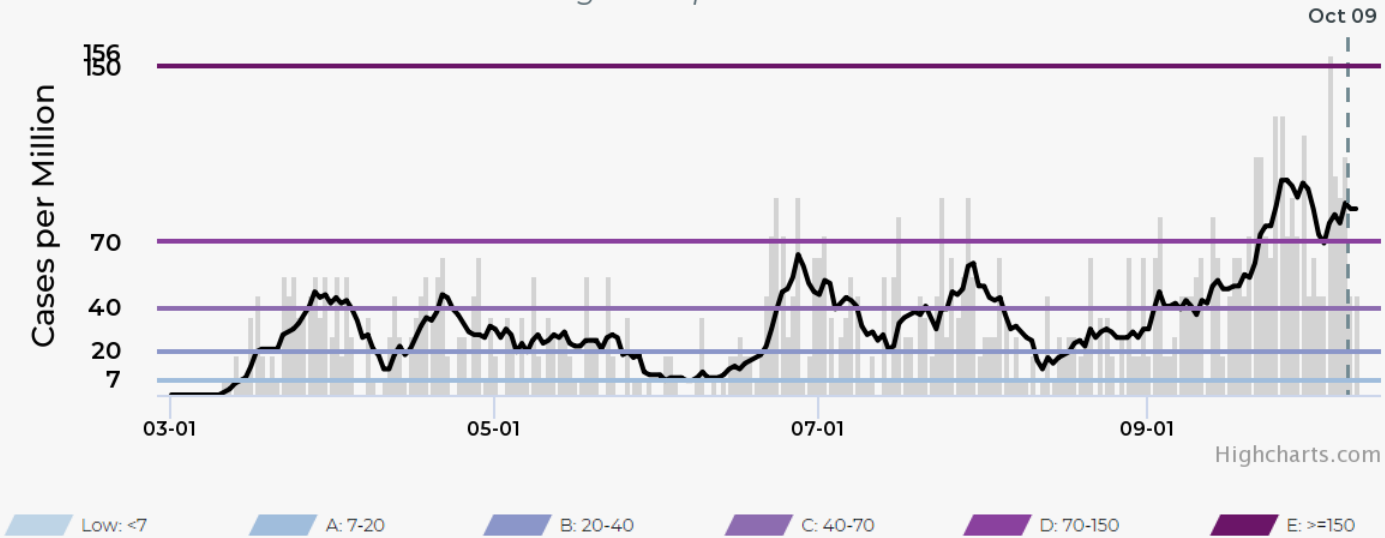

Note: An additional grouping of 0-9 year olds has been added to more closely match data published by the State of Michigan
