

Eaton County COVID-19 Vaccinations

Population Data As Of 10/11/2021

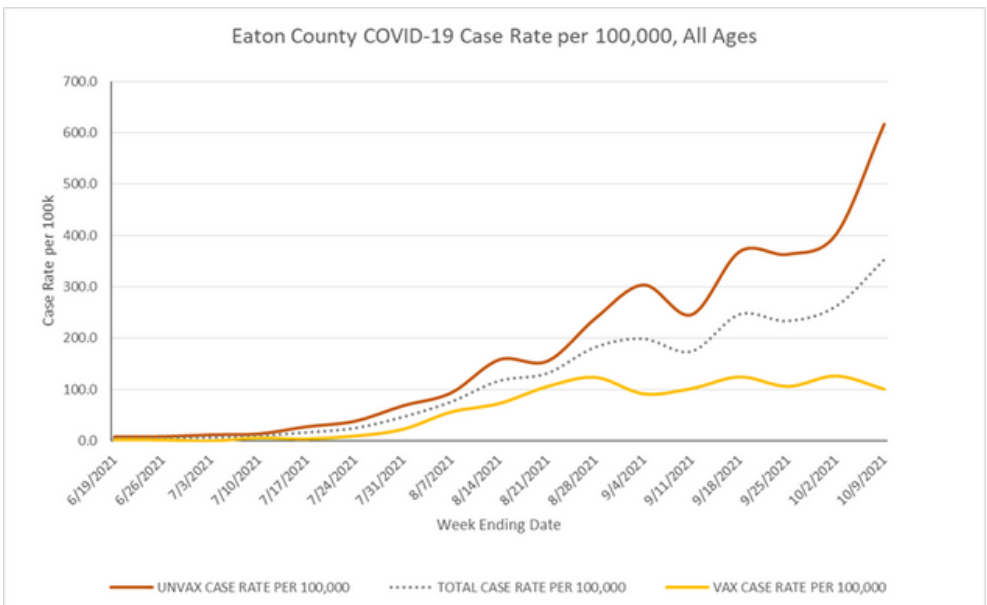

Over 60,545 Eaton County residents have received their first dose of COVID-19 vaccine.

Our goal is to vaccinate 70% of the 90,007 people in Eaton County 16 or older, which is just over 63,000 people.

Nearly everyone who got COVID-19 in September was unvaccinated or not yet fully vaccinated. COVID-19 cases among the vaccinated are called "breakthrough cases", and are more likely when there is more virus circulating in the community. They are rare and often mild.

Barry-Eaton District Health Department

Most data is available to the public at [Michigan.gov](https://michigan.gov) on the COVID-19 Vaccine Data Dashboard.
