

Getting 'Back to Normal' Is Going to Take **All of Our Tools**

If we use **all the tools** we have, we stand the best chance of getting our families, communities, schools, and workplaces “back to normal” sooner:

Get Vaccinated.

Wear a mask over your nose and mouth.

*Stay 6ft. away from others
& avoid large crowds.*

Wash hands often.

Even people who get the vaccine should continue to protect themselves against COVID-19 using the same prevention methods as before!

We also know not everyone will be able to get vaccinated right away, so it's still important to protect yourself and others.

Vaccinated persons with an exposure to someone with suspected or confirmed COVID-19 are not required to quarantine if they meet all of the following criteria:

- Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine)
- Are within 3 months following receipt of the last dose in the series
- Have remained asymptomatic since the current COVID-19 exposure

Vaccinated inpatients and residents in healthcare settings should continue to quarantine following an exposure.
